Oceans

By Beverly McMillan and John A. Musick

INSIDERS -- a visually groundbreaking, state-of-the-art nonfiction series that outshines Eyewitness and Discoveries.

This stunning new series offers an inside look into twelve riveting subjects, beginning with *Dinosaurs*, *Egypt*, *Oceans*, and *Space*. Expertly written, each book features an arresting design, complete with dynamic, multi-layered CGI and 3D model imagery that is complemented by fascinating, up-to-date information presented in a user-friendly format.

Oceans is a multi-dimensional showcase of the aquatic universe! Take a look inside the formation of waves and tsunamis, see a cross-section of an underwater living lab, and explore the plant and animal species that live miles beneath the ocean's surface.

Innovative. In depth. INSIDERS.

Simon & Schuster Children's
Publishing, July 2007
Paper Over Board, 64 pages
ISBN: 1-4169-3859-1
Ages: 8 - 12
